

REMOTE MONITORING

P3GenAware

Peace-of-Mind Solutions Through Remote Generator Monitoring

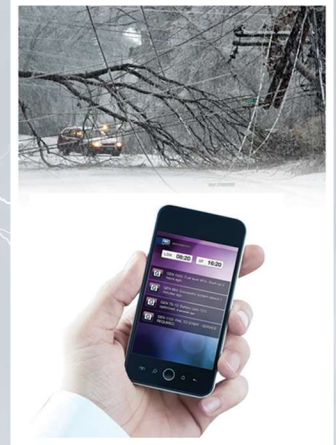

There is probably not a single component in your facility that makes members of your team more nervous than the generator. Yet, it is one of the most important. All anyone really cares about is that it works when it is supposed to. P3GenAware remote monitoring is designed to ease generator anxiety by carrying the burden and making it more manageable for you and your team.

A Pro-Active Approach to Generator Maintenance!

WHAT IT MEANS TO YOU

P3GenAware is perfect for Administrators and Managers by providing visibility into the health of emergency power systems, especially during crisis situations.

- Real-time generator information sent directly to your smartphone, tablet, or PC.
- Alerts you and your team of potential problems before they become big concerns.
- Enables quicker service response times.
- Increases efficiency of technician dispatch by providing insight into the problem ensuring the right tools and parts are brought on-site.
- On-line archival of run times and other data for state required documentation.

COMPATIBLE WITH ALL MAJOR GENERATOR BRANDS

P3GenAware equipment has been recognized as an M2M industry leader for over 15 years dedicated to enhancing the reliability of generators. The P3GenAware system prevents 95% of Fail-to-Start events by immediately sending alerts when common problems like these are detected:

- Low Fuel Level
- Low Battery Voltage
- Low Coolant Level
- Missed Exercise
- Uncleared Alarms
- *And Many More!*

THE MANY BENEFITS OF P3GenAware MONITORING

- Wireless Monitoring 24/7/365
- Time/Date Stamped Event Logs
- Data Archiving and Export
- Instant Alarm Notifications
- Weekly Activity / Status Reports
- "Over-the-air" Technology
- P3GenView Secure Web-based Management
- Provides Automatic System Updates

BE PROACTIVE. GAIN INSIGHT. BE ABLE TO BETTER MANAGE POWER RELATED EVENTS WITH P3GenAware.
